### **MxSecure Expands Offerings with M\*Modal Speech Recognition Solution**

*Strengthens MxSecure's ability to provide affordable and timely transcription services*

Scottsdale, AZ, (PR WEB) May 21, 2009 – MxSecure, Inc., the nation's leading provider of transcription services to group practices, multi-specialty clinics and community health centers, announced today it will incorporate M\*Modal's Conversational Documentation Services (CDS) and speech recognition technology into its client offerings. M\*Modal's sophisticated Speech Understanding technology will be seamlessly integrated into MxSecure's document management software, MxTranscribe EHR™, allowing for immediate turnaround time of dictated files and requiring no change to physician or staff processes.

"M\*Modal's AnyModal CDS gives us a powerful new option as we help clients design the most efficient and cost-effective workflow for their practice," says MxSecure's CEO, Colin Christie. "Incorporating M\*Modal's Speech Understanding technology into our document management software, MxTranscribe EHR™, allows physicians to turn their dictations into shareable, interoperable data that is consistent with meaningful use requirements of the American Recovery and Reinvestment Act of 2009."

MxSecure's medical transcription services allow physicians and approved support staff to login for secure, easy access to patient records any time of day or night. The medical transcription and document management software is fast to download, installs automatically, and easily integrates with EHR systems. The addition of M\*Modal's Speech Understanding solution, transforms dictation directly into accessible, retrievable, and shareable electronic files, while requiring no change to the physician's dictation behavior.

"As practices of all sizes turn to transcription services to help produce shareable electronic health records (EHRs), easy to use, affordable systems are critical", said Michael Finke, CEO of M\*Modal. "Our advanced technology combined with MxSecure's outstanding transcription services, patient workflow, and documentation management solutions, will enable practices of any size to implement EHR in a cost-efficient way."

#### **About M\*Modal**

M\*Modal, based in Pittsburgh, PA, offers on demand conversational documentation services that help healthcare providers capture discrete clinical information from dictation to generate complete and timely electronic medical records. The company's unique Speech Understanding solution AnyModal CDS, is a vital tool that empowers physicians to capture clinical facts and orders from dictation without requiring any change to their normal dictation routine. M\*Modal's focus is on providing hospitals, healthcare IT vendors, and medical transcription service providers with the industry's most comprehensive yet most adaptable solution for creating highly accurate, structured, encoded, and shareable medical documents to increase patient safety, promote continuity of patient care, and reduce cost. For more information on M\*Modal, visit its Web site at: [www.mmodal.com](http://www.mmodal.com)

#### **About MxSecure, Inc.**

MxSecure, Inc. – the fastest growing provider of medical transcription services to medical practices as recognized by *Inc. 5000* – serves thousands of health care providers in over 600 medical facilities nationwide. MxSecure clients include physician and group practices, community health centers and multi-state, multi-specialty clinics. The company's digital medical transcription and electronic document management system – MxTranscribe EHR™ – includes Internet-based access to files 24/7; online review and editing; single and dual electronic signature; key word search capabilities; distribution options for routing to network printers, faxing and secure e-mail; and detailed management reporting tools. MxTranscribe EHR™ is fully scalable to multiple clinic locations with no capital outlay required. MxSecure also offers MxNotes™, a user-friendly, internet-based transcription service designed exclusively for medical practices with fewer than three physicians. With MxNotes™ physicians can dictate, review and edit electronic transcriptions within 24 hours of signing up. For more information see [www.MxSecure.com](http://www.MxSecure.com)
